## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

**Claims 1-6 are pending**

### *Response to Arguments*

The Applicants arguments filed on September 22, 2003 have been fully considered.

The Examiner states that the Cordry et al. (US Patent 6,418,417) reference has been withdrawn.

### *Claim Rejections - 35 USC §101*

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-3 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In claim 1 the applicant claims a method for valuating natural gas futures and options contracts using weather-based metrics, comprising the steps of: receiving an input from a user indicative of the number of monthly gas contracts desired for a period of time; receiving historical weather information for at least one basket of cities during said period of time; receiving future weather information for said basket of cities during said period of time; receiving historical natural gas inventory information for said basket of cities during said period of time; applying a series of regression analyses to obtain a predicted baseline value for each of the monthly gas contracts within said period using said received historical weather, future weather, historical natural gas inventory, and historical gas futures contract price data, and applying a series of recommendation rules to said baseline value. This process might be performed without the aid of any technology and therefore the claimed method is not within the technological arts.

All that is necessary to make a sequence of operational steps in a statutory process within 35 U.S.C. 101 is that it be in the technological arts so as to be in concordance with the Constitutional purpose to promote the progress of "useful arts" *In re Musgrave*, 431 F.2d 882 167 USPQ 280 (CCPA 1970)

A claim is limited to a practical application when the method, as claimed, produces a concrete, tangible and useful result: i.e. the method recites a step or act of producing something that is concrete, tangible and useful. *See AT&T v. Excel Communications Inc.*, 172 F3d at 1358, 50 USPQ2d at 1452.

Claims 2-3 are dependant on claim 1 and are rejected for at least the same reasons.

### *Allowable Subject Matter*

Claims 4-6 are allowable over the prior art record.

***Conclusion***
